PROFESSIONAL SUMMARY

Full-Stack Developer and AI/ML Engineer (B.Tech CSE, VIT Bhopal, CGPA: 8.81/10) who has shipped 11+ production web and AI/ML applications using React.js, Node.js, Python, TensorFlow, and OpenCV, including a Smart India Hackathon 2025 National Runner-Up platform selected from 1000+ competing teams and a Government-recognised, patented computer vision system. Skilled in REST API design, unit-tested and maintainable code, cloud deployment, CI/CD pipelines, and database management within Agile teams. Solved 180+ LeetCode problems with strong Data Structures and Algorithms fundamentals.

WORK EXPERIENCE

Software Engineer Intern | Devplex AI

Nov 2025 – Feb 2026 | Remote

- Built and optimized production-facing frontend features, working directly with product and marketing stakeholders to turn requirements into deployed improvements.
- Contributed to workflow and platform improvements as part of cross-functional strategic initiatives, adapting quickly to changing priorities.

Open Source Contributor, GirlScript Summer of Code (GSSoC)

Oct 2024 – Nov 2024 | Remote

- Contributed to multiple frontend and full-stack open-source repositories using React.js, resolving issues and improving code quality and technical documentation.
- Reviewed and merged pull requests across distributed teams, delivering cleaner, more maintainable UI components.

PROJECTS

1. Vasudha (SIH '25 Runner Up) | React.js, Node.js, Blockchain, AI, Mobile App | Vasudha-dahd.app

- Architected a full-stack digital ecosystem for AMU and MRL monitoring, serving 6 stakeholder roles and competing against 1200+ teams to secure SIH 2025 National Runner-Up.
- Engineered a Smart MRL Engine within the 6-stakeholder platform to calculate drug withdrawal periods and enforce digital sales locks on non-compliant transactions.
- Implemented Blockchain-based traceability across all 6 stakeholders to maintain immutable audit records linking prescriptions to retail dispensing.

2. Smart Flow Traffic Management (Published Patent) | Python, OpenCV | ML Model Development | Smartflow-traffic-management

- Engineered a real-time computer vision system for multi-lane vehicle detection, achieving 92%+ accuracy with sub-200ms inference latency.
- Trained a TensorFlow-based traffic flow forecasting model that improved lane clearance prediction accuracy by 30% over baseline heuristics.
- Constructed a full-stack monitoring dashboard with a Flask API and React.js frontend, visualizing live detection and forecasting output from the 92%-accuracy model in real time.

3. Samvidhan Path | React.js, Node.js, Express.js, TailwindCSS | Frontend & Backend Developer | samvidhan-path.vercel.app

- Designed and delivered a full-stack constitutional education web application with RESTful APIs and a responsive UI for interactive learning.
- Integrated quiz, timeline, and article modules using a MongoDB-backed Node.js REST API, supporting 500+ active users.
- Assembled reusable, maintainable React.js components and optimised MongoDB queries to improve page load speed and overall application responsiveness.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, HTML5, CSS3
- **Frontend:** React.js, TailwindCSS, Responsive Web Design

- **Backend:** Node.js, Express.js, Flask, RESTful API Development
- **AI/ML:** TensorFlow, OpenCV, NumPy, Pandas, Deep Learning, Computer Vision
- **Databases:** MongoDB, MySQL, Database Design
- **DevOps & Cloud:** Git, GitHub, Microsoft Azure, Vercel, CI/CD
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design
- **Tools & Concepts:** Power BI, Figma, Microservices, OAuth, Agile/Scrum, SDLC

CERTIFICATIONS

Ethnus MERN Fullstack Ethnus	Jul 2025
Azure Data Fundamentals (DP-900) Microsoft	Jun 2025
ServiceNow Virtual Internship Program (CSA Track) ServiceNow University & SmartBridge	May 2026

EDUCATION

B.Tech in Computer Science – VIT Bhopal University	CGPA: 8.81 / 10.00 2023 - 2027
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, System Design	
Class XII – Swami Vivekanand Model School, Barisadri (CBSE)	Percentage: 81% May 2023
Class X – Swami Vivekanand Model School, Barisadri (CBSE)	Percentage: 93.60% Apr 2021

COMPETITIVE PROGRAMMING & OPEN SOURCE

- Solved 180+ LeetCode problems, demonstrating strong Data Structures and Algorithms and problem-solving skills; 200+ GitHub contributions across personal and open-source projects.
- Active open-source contributor (GSSoC, Hacktoberfest, SWoC) on GitHub, merging scalable full-stack features across multiple repositories (React.js, Node.js)

ACHIEVEMENTS

- Published an Indian Patent for a real-time AI-based traffic lane prioritization system, recognised by the Government of India.
- Secured SIH 2025 National Runner-Up among 1000+ teams nationwide for a production-ready full-stack solution created for a Government Ministry.
- Completed a two-week industrial immersion across Bangalore and Chennai, gaining exposure to enterprise Agile workflows and SDLC practices.
